

Calibrated Inertial Systems
+RTK +Dual GNSS

The µIMU™ is a 6-DOF sensor module consisting of a dual Inertial Measurement Unit (IMU). Data output includes angular rate and linear acceleration. IMU calibration includes bias, scale factor, cross-axis alignment, g-sensitivity, and temperature compensation.

The µAHRS™ is a 10-DOF Attitude Heading Reference System (AHRS) sensor module with IMU, magnetometer, barometer, and sensor fusion to estimate roll, pitch, and heading.

The µINS™ is a 10-DOF Inertial Navigation System (INS) sensor module with sensor fusion combining data from an external GNSS receiver and onboard sensors to estimate roll, pitch, heading, velocity, and position.

The µINS Dual™ is a 10-DOF Inertial Navigation System (INS) sensor module with sensor fusion combining data from two external GNSS receivers and onboard sensors. Dual GNSS heading can be determined in environments that are challenging for a magnetometer.

Applications

- Drone Navigation
- Unmanned Vehicle Payloads
- Aerial Survey
- Stabilized Platforms
- Antenna and Camera Pointing
- First Responder and Trackers
- Health, Fitness, and Sport Monitors
- Robotics and Ground Vehicles
- Maritime

Rugged-1

Size: 25.4 x 25.4 x 11.2 mm

Weight: 10.5 g

PCB Module

Size: 16.3 x 12.6 x 4.6 mm

Weight: 1.3 g

Rugged-2

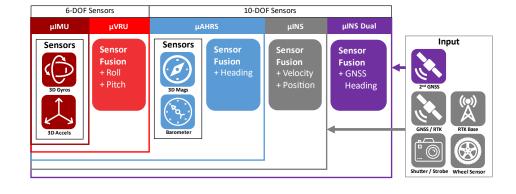

Size: 25.4 x 25.4 x 20.0 mm

Weight: 14.5 g

GNSS: Multi-Band L1/L2/E5

Features

- Up to 1KHz IMU and INS Output Data Rate
- GNSS Multi-Band (L1/L2/G1/B1/B2/E1/E5)
- CAN Bus Interface
- Attitude (Roll, Pitch, Yaw, Quaternions), Velocity, and Position UTC Time Synchronized
- Dual Redundant IMUs Calibrated for Bias, Scale Factor, and Cross-Axis Alignment
- -40°C to 85°C Sensor Temperature Calibration
- On-Board u-Blox L1 GPS (GNSS) Receivers
- Onboard World Magnetic and Gravity Models
- Binary and NMEA ASCII Protocol
- Barometric Pressure and Humidity
- Strobe In/Out Data Sync (Camera Shutter Event)
- Fast Integration with SDK and Example Software
- Data Logging (SDK and Application Software)

Specifications
